Closer Look

Jason McGill

Executive Director

How long have you been Executive Director?

“I have been Executive Director since February 1st, 2021.”

How do you like your position?

“I like it, it gives me access to different seats or positions if you will.”

What’s your favorite part of your job?

“It’s the young people, they are the core of our mission and our project. We have a lot of privileges, in the way that we can take care of our staff. And we have good staff to take care of our youth. I really believe in being able to look over it all and make sure every need is getting met.”

Controversial Question

Which came first, the orange or orange?

- "So I'm going to answer your question with a question. What color are bananas? Actually I changed it. Alright the question I'm answering your question with is what color is the sun and why don't we call the color of the sun banana?"
- "I would say the orange. Well that's a good question. You know what? I think it's the orange."
- "Orange color because it was the orange paint that came before the orange tree came along."
- "The concept of orange supersedes the actual orange. There are plenty of other things perceived as orange. Whereas the concept of the name has been short lived due to sapien evolution being around much longer then the name of the color."
- "This question is beyond my mental capacity. It seems more fair to say because the orange was perhaps deemed the color orange after discovery of the fruit but then again it's not hard to put red and yellow together."
- "The orange. Cause it's The orange with a capital T."
- "Orange. I know for a fact the color orange existed before the fruit orange and that's because someone must've used that name to identify the fruit, but the eminence of the color was around much longer before the fruit."
- "*Crippling confusion* I was reminded today in one of my meetings by someone else that people don't experience time in a linear way and everyone's experience of time is different so who am I to say what came first?"
- "Orange because it's orange."
- "Orange because how do we know the word orange came from the fruit orange rather than another orange thing? Orange can be derived from many things that are orange rather than the orange itself."
- "I think the actual fruit because it's nature and nature came first."
